The purpose of this catalog

This catalog is designed to showcase our full product line, with detailed specifications, packaging options, and value-added features. It also includes exclusive offers and partnership benefits for distributors and clinics.

Catalog Introduction...

Welcome to Dental Plus, where we redefine the quality and innovation of locally manufactured dental materials with international standards.

Since our inception, our mission has been clear

To deliver safe, effective, and scientifically advanced dental products that enhance the experience of both dentists and patients.

Our vision is to become a leading brand in dental manufacturing across the Middle East and to proudly represent Egyptian-made excellence on a global scale.

What sets Dental Plus apart is our commitment to:

- Continuous research and development to ensure product innovation and stability
- Strict in-process and final quality control systems (IPC & QC) at every stage of production
- Reliable after-sales support and technical assistance for professionals and distributors
- Unique product features

Name of product: Etch plus

Code : 12112022

*Composition:
37.5% phosphoric acid*

Properties :

*The etching gel for a strong bond
Etch plus is an etching gel
containing 37% phosphoric
acid. Etch plus is used for
enamel etching and dentin
conditioning in conjunction with sealants,
composite restorations and the adhesive luting
of indirect all-ceramic or composite restorations.*

Name of product : Etch plus

Advantages

- *Balanced handling properties*
- *Quick, effective application due to consistent material thickness*
- *Colour can be easily differentiated from the tooth*
- *Special displacer on the plunger ensures economical dispensing of material*
- *Practical economic price*

Area of application

Etch plus is used in the enamel etch or total etch technique for the following indications:

- *Composite restorations*
- *Adhesive luting of inlays, crowns, bridges, veneers, adhesive bridges and root canal posts*
- *Splints*
- *Luting of orthodontic appliances (e.g. brackets) and bonding of tooth jewellery (e.g. Skyce)*
- *Fissure sealings*

DELIVERY FORMS

Syringe 3 ml

Syringe 5 ml

DENTAL PLUS
WE ARE NOT CUTTING CORNERS

Name of product: **EDTA PLUS SOLUTION**

Code : 02022023

Composition:
17% (ethylenediaminetetraacetic acid)

Properties :

EDTA 17% solution with a powerful chelating action for enhanced cleaning and lubrication of the root canals.

Access to tight canal apices

Optimal 8,5 pH for optimal performances

Reduces friction of endodontic instruments

DENTALPLUS
WE ARE NOT CUTTING CORNERS

Name of product: **EDTA PLUS SOLUTION**

•Indications

- oEDTA solution 17% (ethylenediaminetetraacetic acid) is a powerful chelating solution to remove inorganic debris (smear layer) and lubricate the canals in endodontics.

- oLoosen up calcifications

- oRemove smear layers

- oAllow instrumentation (canal shaping) and debridement in a tight/calcified root canal towards the apex.

•Features & benefits

- oEDTA 17% concentration effectively removes inorganic material and provides possibility to obturate greater number of lateral canals

- oOptimized chelation provides optimal performance for proper root canal cleaning

DELIVERY FORM : 120 ML BOTTEL

Name of product: Edta plus cream

Code : 04042023

Composition:

17% (ethylenediaminetetraacetic acid) 10% carbameid

Properities :

*EDTA cream for simple and effective preparation
of the root canals and removal of smear layer and calcification.*

Removes inorganic substances

Reaches narrow canals

Reduces friction of endodontic instruments

DENTAL PLUS
WE ARE NOT CUTTING CORNERS

Name of product: **Edta plus cream**

•Indications

- oRoot canal preparation with endodontic instruments
- oPresence of calcification in the canal
- oNarrow canals in posterior teeth
- oSmear layer removal
- Features & benefits
 - oReduces friction of endodontic instruments thanks to a lubrication effect for an easy root canal preparation and filing
 - oRemoval of inorganic substances through chelating action for an effective root canal preparation and cleaning

Delivery form : 7 gm syringe

Name of product: Root paste

Code : 08082024

Composition:

calcium hydroxide , barium sulfate , water

DESCRIPTION :

High pH value for temporary root canal dressing

Root paste is a radiopaque, creamy and ready-to-use calcium hydroxide paste for temporary root canal dressing.

When temporisation of the root canal between two appointments is required, calcium hydroxide paste is the standard material to use. The product is intended to eliminate remaining microorganisms and prevent reinfection between.

The main properties of the calcium hydroxide paste are thanks to its alkaline pH.

The usual duration of temporisation treatment is between 1 and 3 weeks.

The product features a high pH (above 12).

With a radiopacity > 300% of the dentine radiopacity,

Opacal is one of the most radiopaque calcium hydroxide paste, ensuring easy identification and efficient follow-up.

Root paste is an aqueous non-setting material.

This characteristic induces rapid ionic release and performant action in short treatment time procedures.

Calcium hydroxide pastes: classification and clinical indications).

In addition, the paste can be easily removed

Name of product: *Root pex*

FEATURES & BENEFITS

- 1_Saves time! Pre-mixed and pre-filled*
- 2_Excellent antibacterial and bacteriostatic properties*
- 3_Highly radiopaque*
- 4_Fast and easy application*
- 5_Pharmaceutical grade iodoform*
- 6_Complete coating of canal walls*
- 7_Does not harden, so $\text{Ca}(\text{OH})_2$ remains active*

Delivery form :
syringe 3ml (1.5gm)

Name of product: candy plus

Code :

Composition: caine , gelling agent

• **Indications**

o Topical analgesia of oral mucosa before anaesthetic injection

- Temporary Relief of pain due to minor irritation or injury of the oral mucosa and gums.

- Temporary relief of pain associated with ,denture or orthodontic appliances

- Gingival Application before Scaling.

• **Features & benefits**

o Fast and effective Topical anaesthetic gel

o Easy to use gel formulation with Dye-Free flavouring and no bitter taste.

Delivery form : 30gms jar
